

COVID-19 cases in the Baltic States

These graphs describe the development of COVID-19 by confirmed cases and deaths in the Baltic States, using data from the Johns Hopkins coronavirus map. The original model for these graphs was made by @ryancbriggs to create graphs for Canada's provinces and territories; it has been adapted by @rmartinnielsen to do the Baltic States instead. You can also review the Rmarkdown source for this page.

Graphs

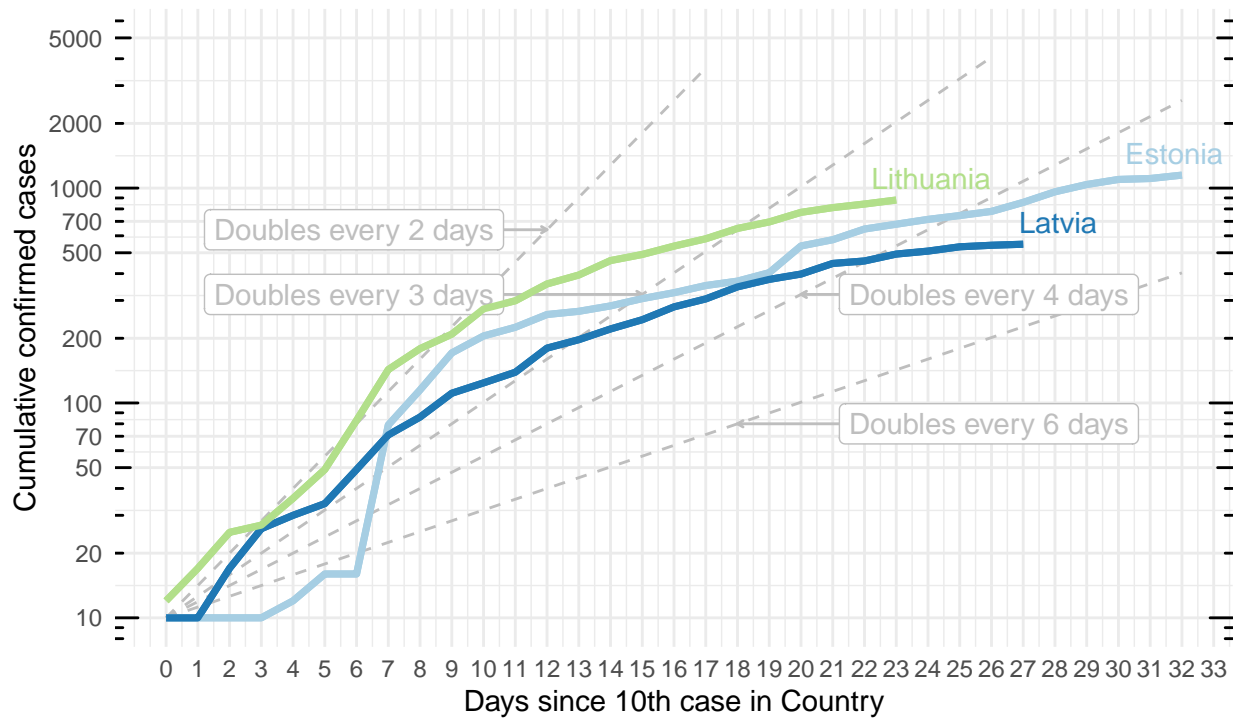

Confirmed cases

Confirmed cases since 10

COVID-19 Confirmed Cases in Baltic States

Current as of April 07, 2020
